Developing your AI project

Sonja Aits
Lund university,
2023-12-14

Individual projects (examination)

- Evaluate related research (at least 1 article)
- Design project: **use the template!!!**
- Present and review projects (January 22 or 23)

Title

Name(s)

Research aim

Overall research aim:

Improve survival of cardiac arrest patients (overall goal of your research programme)

Specific project aim:

AI system which identifies cardiac arrest cases in calls to emergency services

Related work

Summary:

Read publication related to your work (e.g. paper describing the state of the art solution for your specific task or a study using an AI approach for a similar biomedical/life science question).

Summarize main findings with relevance for your project, e.g. type of model, evaluation strategy, data, main results

Reference(s):

Data

Description:

Recordings of emergency services phone calls (n = 10000)

Transcription and stress level score of selected phone calls (n = 300)

Labels: Stroke diagnosis yes/no

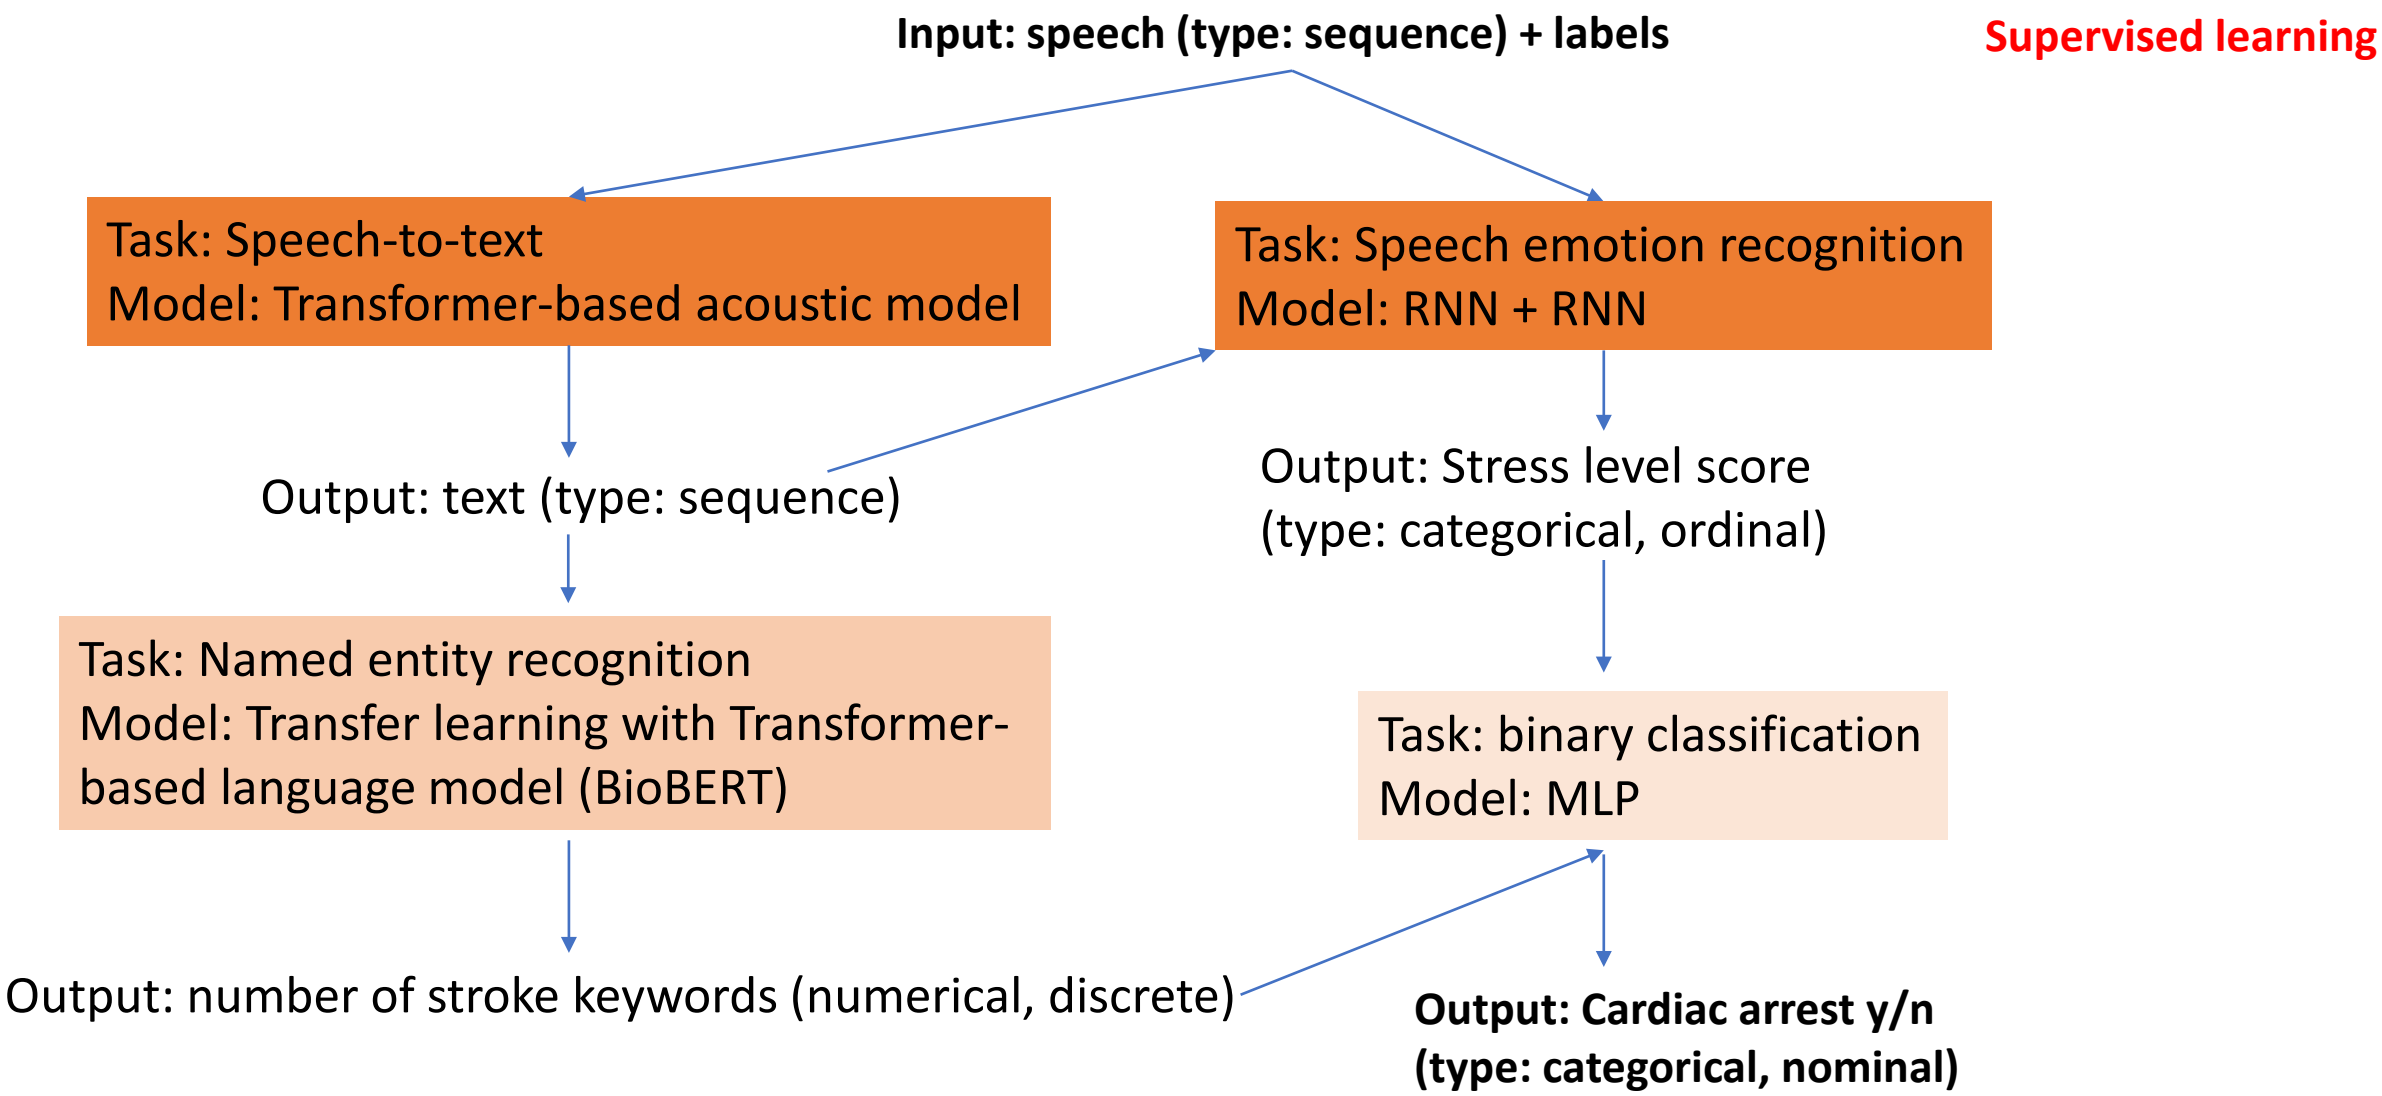
Public data source(s), if any:

Riksstroke quality register

Data preprocessing and augmentation:

Use only first minute of each call

AI strategy



Input: speech (type: sequence) + labels
Supervised learning
Task: Speech-to-text
Model: Transformer-based acoustic model
Task: Speech emotion recognition
Model: RNN + RNN
Output: text (type: sequence)
Output: Stress level score
(type: categorical, ordinal)
Task: Named entity recognition
Model: Transfer learning with Transformer-based language model (BioBERT)
Task: binary classification
Model: MLP
Output: number of stroke keywords (numerical, discrete)
Output: Cardiac arrest y/n
(type: categorical, nominal)

Evaluation

- Confusion matrix
- Precision
- Recall

Technical challenges

Describe expected problems and, optionally, how you plan to address them (e.g. issues related to data/models/evaluation, lack of expertise/infrastructure, etc)

Ethical, legal and societal challenges

- Describe potential issues and how you plan to address them

Beyond this course…

How to learn more about AI
